HOW WE VOTED IN 2012

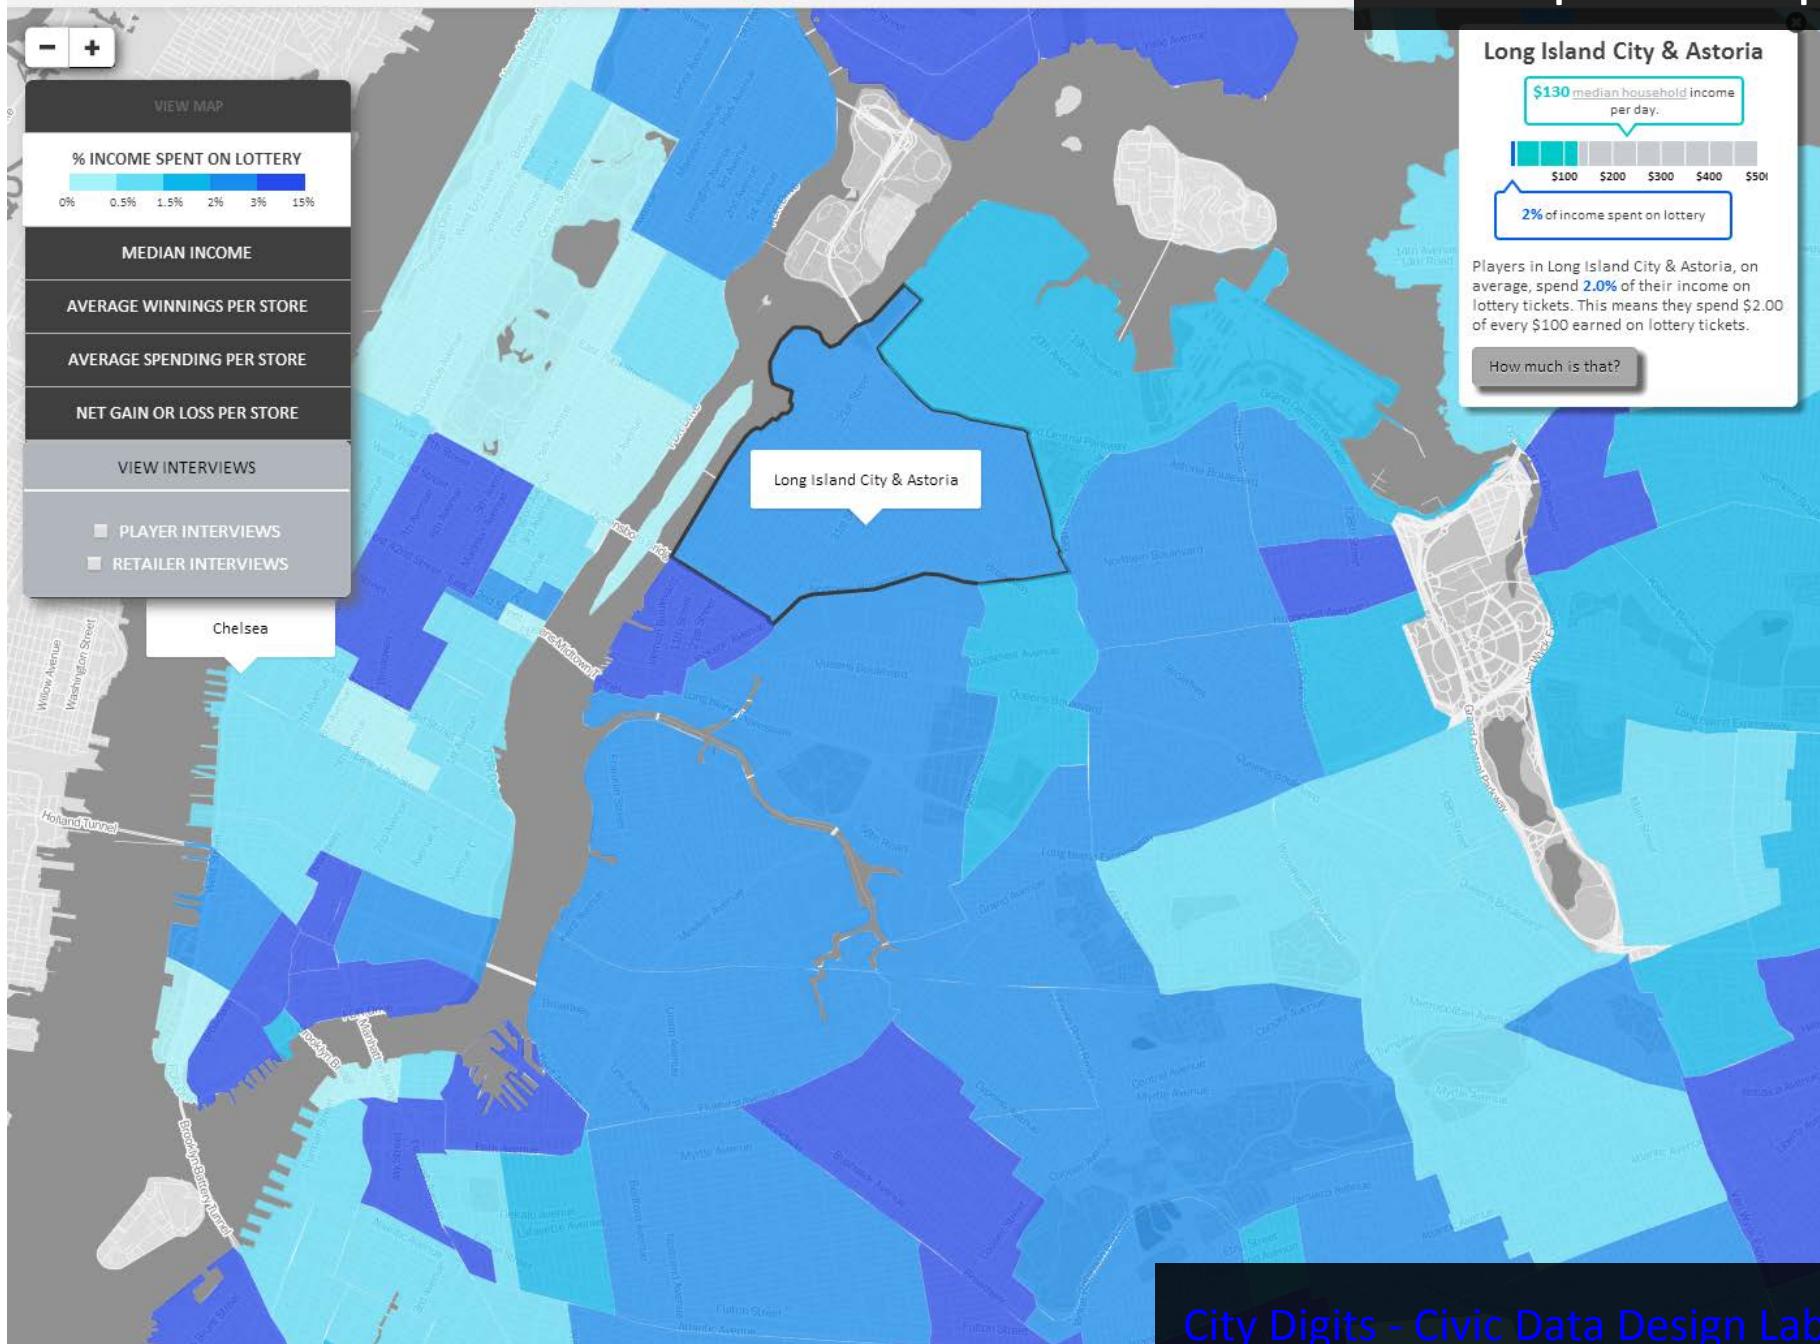

Broken down county by county rather than state by state, Tuesday's voting results show that President Obama gained re-election through continued strength in more densely populated areas along the East and West coastlines, as well as in the Great Lakes states. As in the past, enclaves such as northeast Minnesota also helped the Democratic incumbent, as did an increasing Hispanic population in parts of the U.S. Southwest. The nation's heartland and South and a sizable part of the mountain region were solid ground for Republican Mitt Romney.

Then as Now — New York's Shifting Ethnic Mosaic

By FORD FESSENDEN and SAM ROBERTS

A century ago, Israel Zangwill popularized the term in his play, "The Melting Pot." New York has evolved into a greater crucible of race and ethnicity today than it was back then, but the city also remains very much a mosaic — a variegated montage of neighborhoods in which certain groups predominate.

In a month or so, the 2010 census will most likely confirm a record high in the city's foreign-born population. American Community Survey data released last month revealed a striking metamorphosis during the last decade. Traditional ethnic enclaves sprawled amoeba-like into adjacent communities. Once monolithic tracts of white and black and native-born residents have become bespeckled with newcomers.

Mapping America: Every City, Every Block

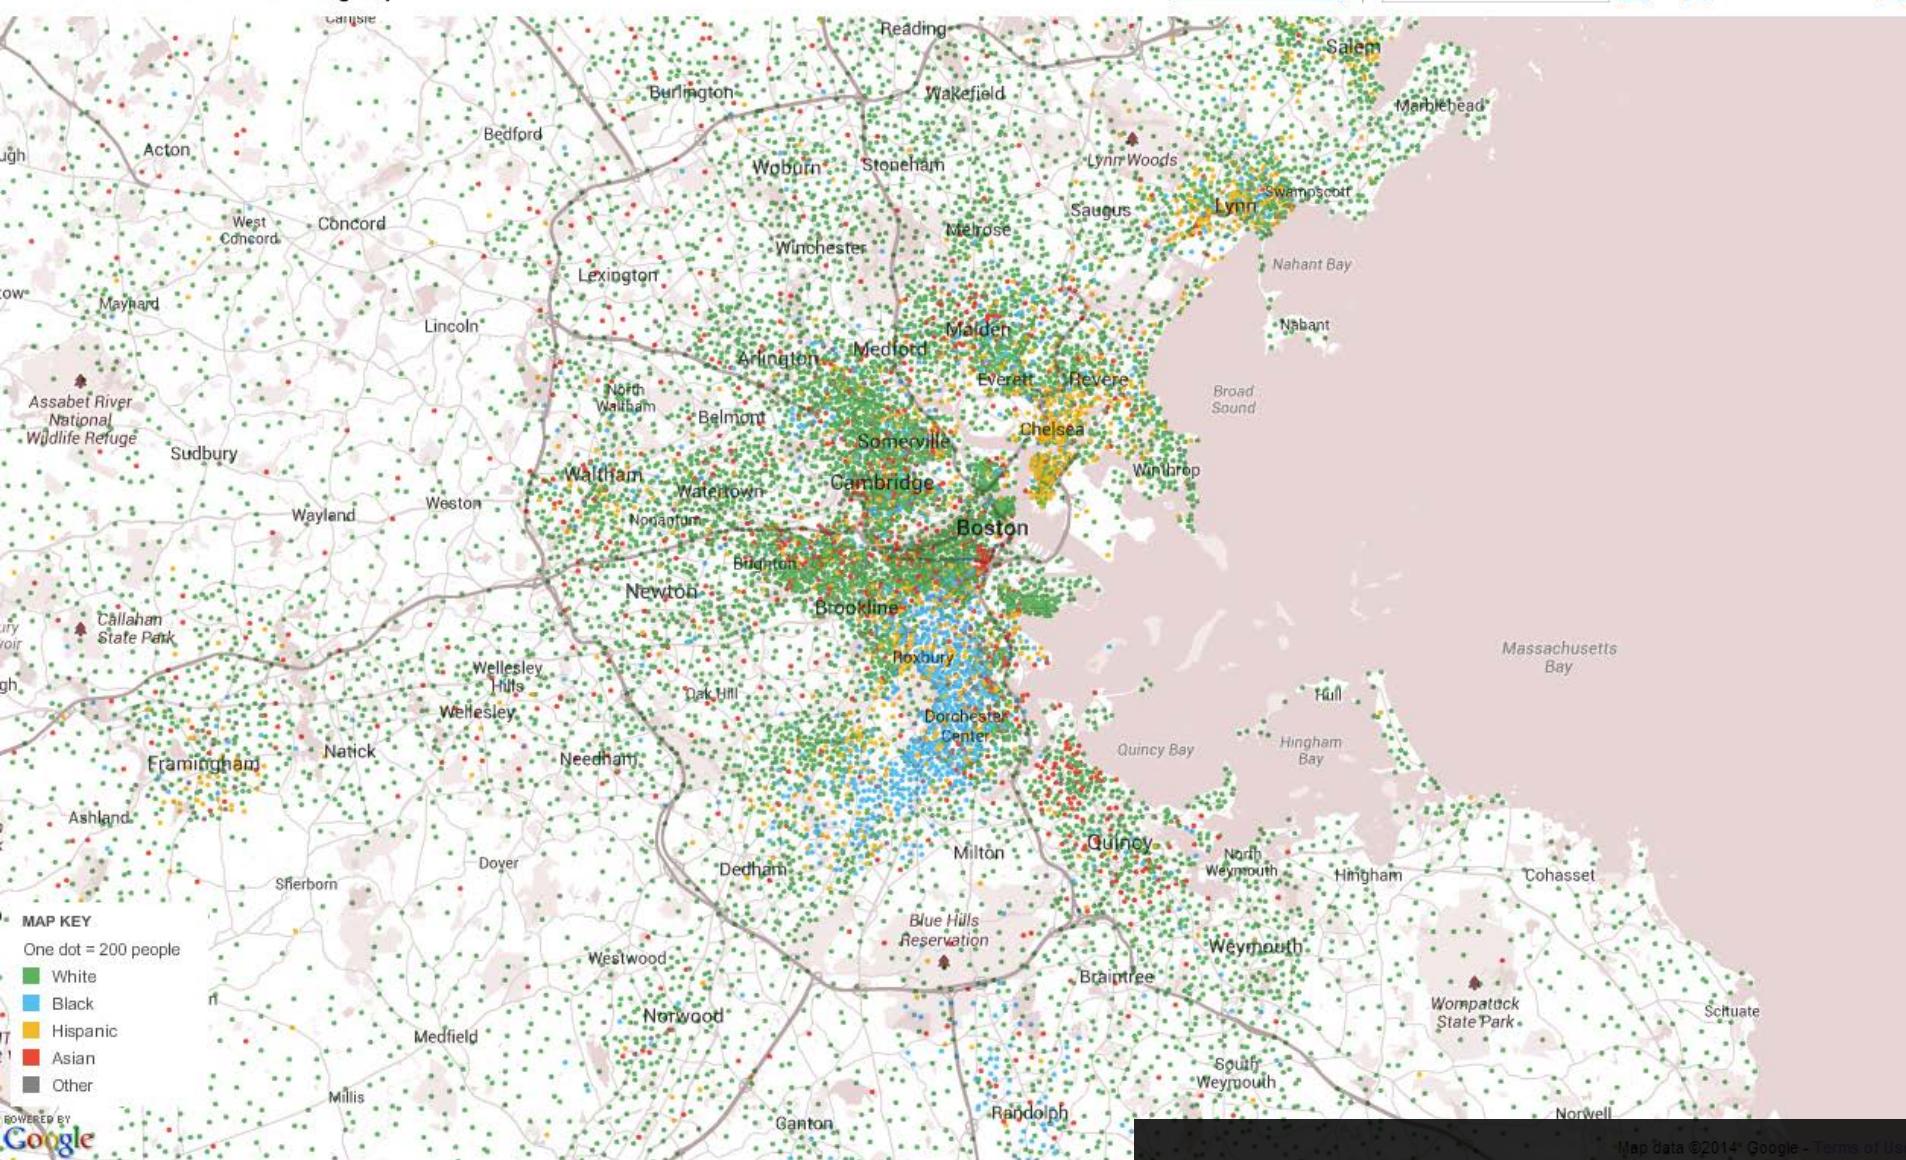

Browse local data from the Census Bureau's American Community Survey, based on samples from 2005 to 2009. Because these figures are based on samples, they are subject to a margin of error, particularly in places with a low population, and are best regarded as estimates.

New York Outage

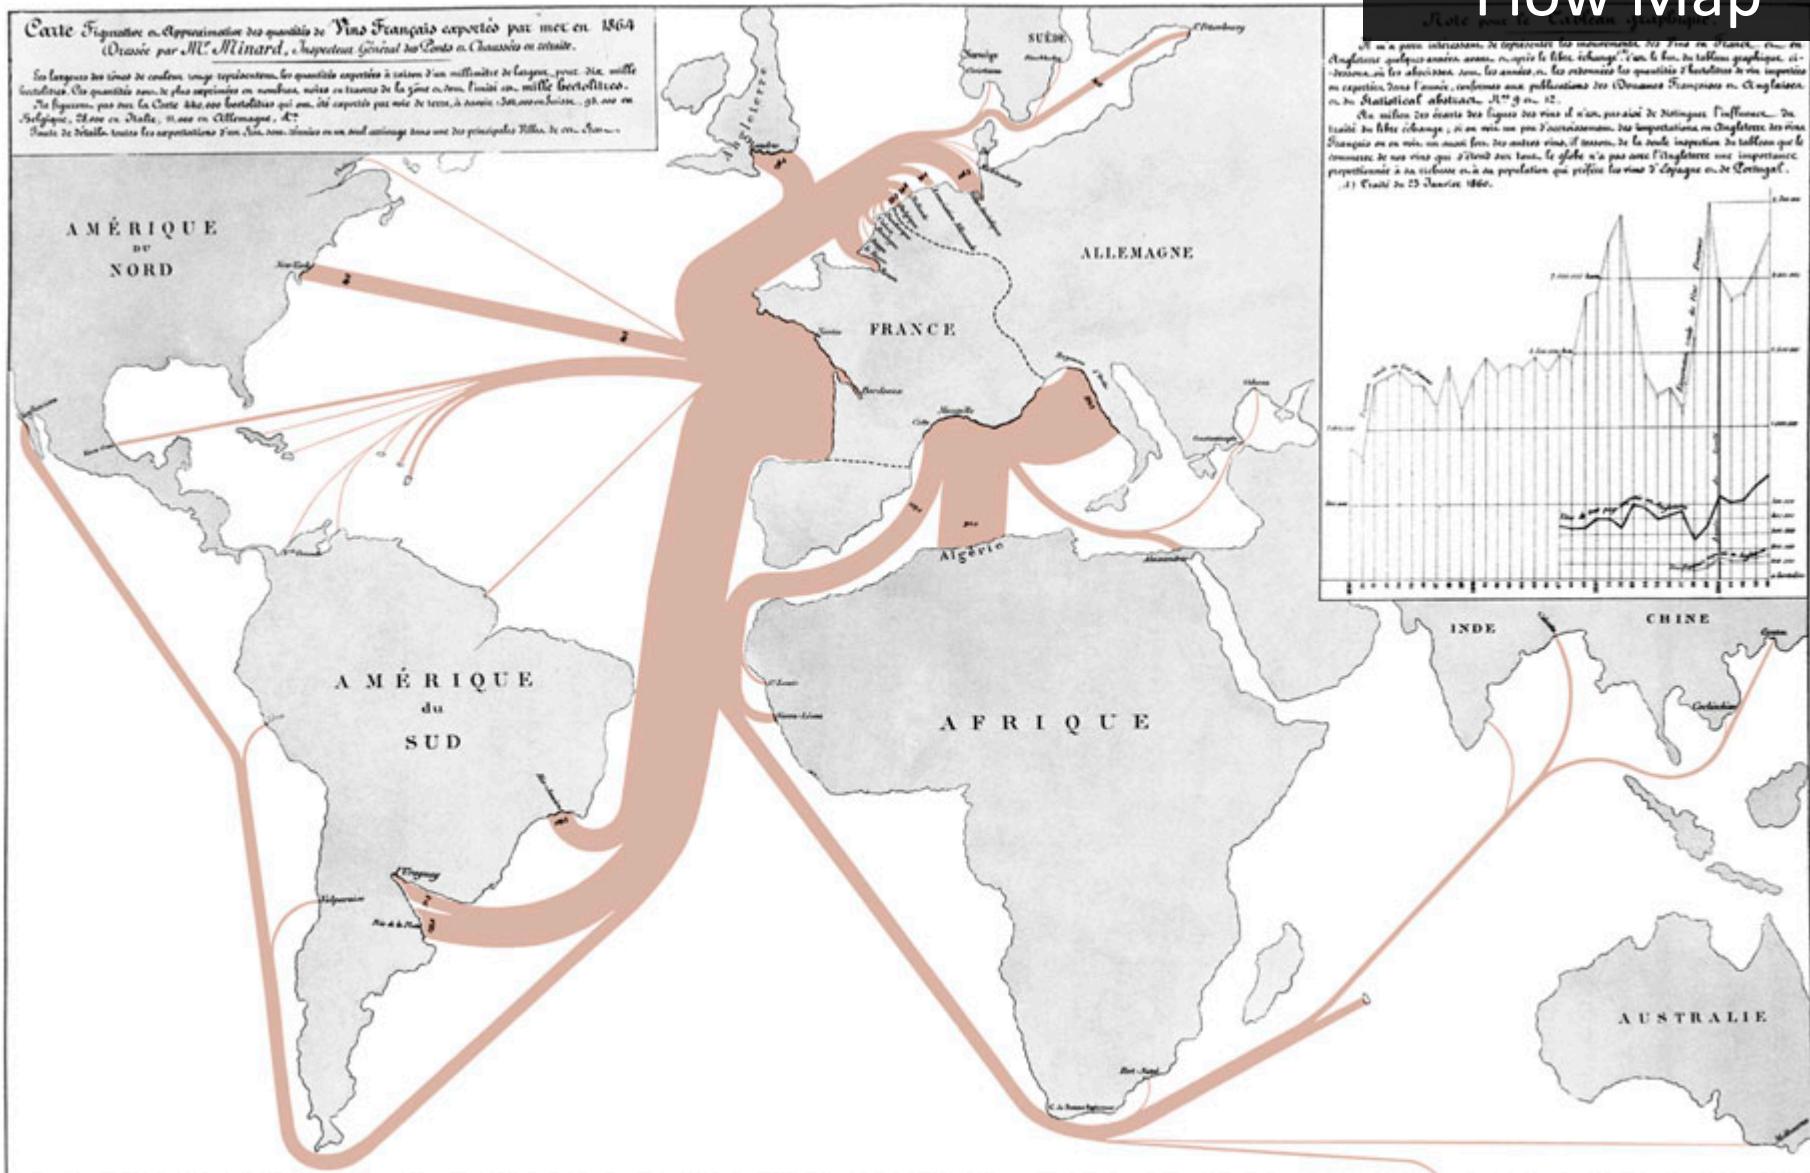

As of Friday afternoon, nearly half a million New Yorkers were still without power following the destruction caused by Hurricane Sandy. Early this evening, power was beginning to return to neighborhoods throughout Lower Manhattan. Con Edison plans to have all of Manhattan restored by tomorrow, but much of the rest of the city may remain without power for one more week.

Charles Joseph Minard, *Tableaux Graphiques et Cartes Figuratives de M. Minard*, 1845-1869, a portfolio of his work held by the Bibliothèque de l'École Nationale des Ponts et Chaussées, Paris.

C. J. Minard - French Wine Exports 1864

Carte Figurative des pertes successives en hommes de l'Armée Française dans la Campagne de Russie 1812-1813.

Dessiné par M. Minard, Inspecteur Général des Ponts et Chaussées en retraite. Paris, le 20 Novembre 1869.

Les nombres d'hommes perdus sont représentés par les larges des zones colorées à raison d'un millimètre pour dix mille hommes; ils sont de plus écrits en lettres dans les zones. Le rouge désigne les hommes qui ont été en Russie, le noir ceux qui en sortent. — Les renseignements qui ont servi à dessiner la carte ont été puisés dans les ouvrages de M. Chier, de Segur, de Terezac, de Chambray et le journal médical de Jacob, pharmacien de l'Armée depuis le 28 Octobre.

Pour mieux faire juger à l'œil la diminution de l'armée, j'ai supposé que les corps du Prince Nérome et de Maréchal Davout, qui avaient été détachés sur Minsk et Mohilow et qui rejoignirent vers Orsha et Vitebsk, avaient toujours marché avec l'armée.
